

Workshop: Current and future applications of non-invasive and invasive BCIs

Centrul de Medicina Capului & Gheorghe Asachi Technical University of Iasi & g. tec medical engineering Austria

May 27th, 2017

Venue: CENTRUL DE MEDICINA CAPULUI

Str. Legumiculturii Nr. 2 Timisoara

Tel: +400721239801

About the Workshop

Research groups all over the world have been working enthusiastically on Brain-Computer Interfaces (BCIs), which provide a direct connection from the human brain to a computer. BCIs translate brain activity into control signals for numerous applications, including tools to help severely disabled users communicate and improve their quality of life. BCIs have been used to restore movement, assess cognitive functioning, and provide communication and environmental control. During this workshop, we will demonstrate the three major BCI approaches motor imagery, P300 and steady state visual evoked potentials (SSVEP) - for spelling, assessment, rehabilitation and robot control. We will also explain new directions like active and dry electrodes, invasive ECoG systems and advanced VR control. The audience will see all the required hardware and software, procedures for cap mounting, training and classifier setup, and BCI operation. We will invite audience members to participate in live demonstrations, providing real-world examples of modern BCI performance in field settings.

Program:

- 9:30 **Daniela Reisz:** First step – from the EEG to the reading of mind
- 10:00 **Marian Poboroniuc:** TUIASI research related to BCI-based Rehabilitation
- 10:30 **Francisco Fernandes & Danut Irimia:** Introduction to major methodological approaches of BCI & introduction to hard- and software. Theoretical preparation of the hands-on experiments.
- 11:00 **Gabriela Tanasie** Learning and Memory
- 11:30 **Andrei Brinzeu** Bio feedback and Pain
- 12:00 Lunch break
- 13:00 *Hands-on sessions:*
BCI live experiments, g.Nautilus, Recoverix
- 16:00 *Final discussion & questions*

Attendance is free of charge but registration is required due to limitation of space. Please contact: Daniela Reisz reisz_daniela@yahoo.com, Marian Poboroniuc mpobor@tuiasi.ro or Francisco Fernandes: fernandes@gtec.at

N.B.: The workshop will be held in English.

Speakers:

Daniela Reisz is Neurologist in County Hospital Timis, is co-founder of the Centre for Head Medicine, UVT lecturer for Master of Philosophical Counselling and Consultancy, and Assistant Professor Neurology

Marian Poboroniuc is Habilitated Professor for Robotics & Neuroprostheses at TUIASI. His current research interests involve mobile robots control algorithms, human motion analysis and synthesis, neuroprosthetics, biomechanics, brain-computer interfaces and rehabilitation robotics. He is actively involved in several national and international research projects, of which most are related to neuroprostheses design and control, BCI and to increasing the pool of qualified Electrical and Information Engineering graduates across Europe (e.g. SALEIE EU project).

Francisco Fernandes is the Regional Sales Officer of g.tec medical engineering GmbH responsible for the Romanian market, between others. Specialised in the commercialization of medical devices, he has been working with g.tec since 2014.

Danut-Constantin Irimia is Assistant Professor for Robotics and System Theory at TUIASI. Since 2012 he is also a research collaborator of g.tec medical engineering GmbH focusing on biomedical signal processing and Brain-Computer Interfaces for post-stroke rehabilitation.

Andrei Brinzeu Neurosurgeon at Hopital Neurologique de Lyon, Master's Degree, Neuroscience, Neuroscience Research 2013 – 2015

Gabriela Tanasie is Associate Professor of Physiology at the Victor Babes University of Medicine and Pharmacy and coordinator the GMP department of the Oncogen research center in Timisoara. Special thanks to Conf. Dr. Gabriela Tanasie and Andrei Brinzeu the hosts of the Workshop.
